

Medication Review Crucial to Member Health Outcomes

Did you know?

Medication Reconciliation Post-Discharge (MRP): This HEDIS® measure ensures that members who are discharged from the hospital have their medications reviewed by a prescribing practitioner, clinical pharmacist or registered nurse within 30 days of discharge.

What do you need to do?

- Reach out to your member and see them within 30 days of a discharge
- Document in the patient's chart indicating:
 - Member's discharge medications were reviewed with the current outpatient medications and/or
 - No medications were prescribed upon discharge
- Send a claim to WellCare for the services above. The suggested codes for these services include:
 - CPT Code 99495, 99496: Transitional Care Management Services and
 - CPT II code 1111F: Medication Reconciliation

These actions can make a big difference to our members. Together, we can deliver the best possible care to our members—your patients.

What is WellCare doing?

- Our Discharge Planning, Pharmacy or Care Management Teams are attempting to reach out to your members and perform the Medication Reconciliation by phone.

If we are successful in reaching your member, WellCare will fax you the results of this call. We ask that you include this fax in your medical record and review these medications with your member when you see them.

- Send a claim to WellCare for the services above. The suggested codes for these services include:
 - CPT Code 99495, 99496: Transitional Care Management Services and CPT II code 1111F: Medication Reconciliation
