

# Improve Patient Experience and Quality of Care

*Patients who have a positive experience are more likely to stay engaged with their health care.<sup>1</sup> Use these tips to help guide your patient engagement approach and improve CAHPS scores.*

Patient experience matters	
<b>Strengthen patient loyalty</b>	A high-quality relationship between patient and provider can greatly affect patient loyalty to your practice.
<b>Improve patient engagement and clinical outcomes</b>	Positive patient experience led to higher adherence to medical advice and treatment plans. <sup>1</sup> Engaged patients are more likely to take charge of their care plan and stay up-to-date with their care.
<b>Uphold reputation</b>	Satisfied and content patients are likely to share their experience with others. Positive reviews can also lead to new patient referrals to your practice.

## What is the CAHPS survey?

- The Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey is an annual health care experience survey that:
  - Asks patients to evaluate their experience with their providers and health plan (i.e. access to care, provider communication, customer service, ease of getting Rx)
  - Includes select Healthcare Effectiveness Data and Information Set (HEDIS®) quality measures<sup>2</sup>
  - Impacts various Rating Systems (Medicare STARS, Quality Rating Systems, Office of the Patient Advocate)
- Administered annually each spring via mail and phone.
- Results help identify opportunities for patient experience improvement.
