How to Locate & Search for a Drug Using the Formulary Tool
Upon completing this video, you will be able to:

Access the Formulary Tool

Search for a drug and locate additional information within the Formulary Tool
Access the Formulary Tool

Step 1
Type www.wellcare.com
Access the Formulary Tool

Step 2

Select a State

Welcome to our new website.

Please select your state to get started:

- Alabama
- Alaska
- Arizona
- Arkansas
- California
- Colorado
- Connecticut
Access the Formulary Tool

Step 3

Click Need a Plan
Access the Formulary Tool

Step 4: Select a plan

Looking for a new plan?

Select a plan

- Medicaid
- Medicare
- Prescription Drug Plans
- CHIP
Access the Formulary Tool

Step 5

Enter ZIP code

I am seeking Medicare

Near 33634

Search
### Access the Formulary Tool

#### Step 6

**Find a health plan**

**Select I want to learn about this plan**

<table>
<thead>
<tr>
<th>Plan Name</th>
<th>Plan Type</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>2018 WellCare Access (HMO SNP)</td>
<td></td>
<td>I want to learn about this plan</td>
</tr>
<tr>
<td>2018 WellCare Dividend (HMO)</td>
<td></td>

Final Step 9

Scroll to the search options
How to Access Formulary Tool Recap

1. Type www.wellcare.com in web browser
2. Select a state
3. Select need a plan
4. Select a plan and type in Zip code
5. Find health plan and select I want to learn about this plan
6. Go to Pharmacy and select Drug List (Formulary)
7. Search a drug using any of the search options
Next, let's review how to search for a drug using the Formulary Tool.
Searching for a Drug Using the Formulary Tool

Step 1

Search for a drug

Therapeutic Class Search:

- Analgesics
- Anesthetics
- Anti-Infectives
- Antineoplastic Agents
- Cardiovascular
- Central Nervous System
- Endocrine And Metabolic
- Gastrointestinal
- Genitourinary
- Hematologic
- Immunologic Agents
- Nutritional/Supplements
- Ophthalmic
- Respiratory
- Topical

- Respiratory
- Topical

Let's search for Crestor using Alphabetical Search function.
Searching for a Drug Using the Formulary Tool

Click on the letter C to search for Crestor alphabetically.
Searching for a Drug Using the Formulary Tool

Scroll down the resulting list of drugs to find Crestor. Note that the drug rosuvastatin will not show in the search. Again, this is important to point out because, while the brand name Crestor is not covered, the member is most likely actually taking the generic drug, rosuvastatin. Click on the appropriate strength of Crestor to return results for both the brand and the generic.

You can find more information about a drug at HealthWise.
Searching for a Drug Using the Formulary Tool

When a brand name is selected, for example Crestor, the results will show both the brand name and the generic.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Tier 2</td>
<td>Tier 2</td>
<td>Generic</td>
</tr>
</tbody>
</table>
Searching for a Drug Using the Formulary Tool

Let's search for Crestor by name, using the Brand & Generic Name Search function.
Type Crestor in the search field, and then click Search.
Searching for a Drug Using the Formulary Tool

In this search, you notice the brand name drug, Crestor, is Non-Formulary (NF). However, the GENERIC for Crestor, Rosuvastatin, is covered on Tier 1 (T1).

This is important. Let's say the member indicates he/she is taking Crestor. He/she is most likely taking the generic, Rosuvastatin.

As an agent, you should ALWAYS verify which form of drug the member is taking. In this case, the agent should verify if the member is taking Crestor.
Searching for a Drug Using the Formulary Tool

Final
Step 3

Click on the selected Drug for more information

Start Over
Please select a drug from the list below to continue.

CRESTOR TABLET 10 MG ORAL
CRESTOR TABLET 20 MG ORAL
CRESTOR TABLET 40 MG ORAL
CRESTOR TABLET 5 MG ORAL
rosuvastatin calcium tablet 10 mg oral
rosuvastatin calcium tablet 20 mg oral
rosuvastatin calcium tablet 40 mg oral
rosuvastatin calcium tablet 5 mg oral

Click on a drug to see more coverage information, such as any restrictions like quarterly limit, etc.
When a brand name is selected, for example Crestor, the results will show both the brand name and the generic.

<table>
<thead>
<tr>
<th>Brand Name</th>
<th>Generic Name</th>
<th>Therapeutic Class</th>
<th>Dose/Strength</th>
<th>Status</th>
<th>Notes &amp; Restrictions</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRESTOR TABLET 10 MG ORAL rosvastatin calcium</td>
<td>rosvastatin calcium tablet 10 mg oral</td>
<td>See Therapeutic Alternates</td>
<td>Tablet 10 MG</td>
<td>NF</td>
<td>more info</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Cardiovascular Antilipemics, Hmg-Coa Reductase Inhibitors</td>
<td>Tablet 10 MG</td>
<td>T1</td>
<td>more info</td>
</tr>
</tbody>
</table>
Searching for a Drug Using the Formulary Tool

To see some common alternatives for the Non-Formulary brand name drug, click on more info. Keep in mind, the generic for Crestor is covered!

To see the quantity limit (QL) details for the formulary drug, rosvastatin, click on more info.

<table>
<thead>
<tr>
<th>Brand Name</th>
<th>Therapeutic Class Sub-class</th>
<th>Dose/Strength</th>
<th>Status</th>
<th>Notes &amp; Restrictions</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRESTOR TABLET 10 MG ORAL rosvastatin calcium</td>
<td>See Therapeutic Alternates</td>
<td>Tablet 10 MG</td>
<td>ALT</td>
<td>more info</td>
</tr>
<tr>
<td>rosvastatin calcium tablet 10 mg oral 6</td>
<td>Cardiovascular Antilipemics, Hmg-Coa Reductase Inhibitors</td>
<td>Tablet 10 MG</td>
<td>Tier 1</td>
<td>more info</td>
</tr>
</tbody>
</table>
When a generic drug name is selected, for example rosvastatin, the results will only show the generic.
Searching for a Drug Using the Formulary Tool

Let's search for Crestor using the Therapeutic Class Search function.
Searching for a Drug Using the Formulary Tool

Searching for a drug by therapeutic class is the least effective method because the appropriate class is not always intuitive. In the example of Crestor, click on Cardiovascular.
When the Cardiovascular class is selected, a list of subclasses is returned. Click on Antilipemics, Hmg-Coa Reductase Inhibitors.
Searching for a Drug Using the Formulary Tool

<table>
<thead>
<tr>
<th>Drug Name</th>
<th>Formulary Class</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>lovastatin tablet 10 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>lovastatin tablet 20 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>lovastatin tablet 40 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>pravastatin sodium tablet 10 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>pravastatin sodium tablet 20 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>pravastatin sodium tablet 40 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>pravastatin sodium tablet 80 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>rosvastatin calcium tablet 10 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
<tr>
<td>rosvastatin calcium tablet 20 mg oral</td>
<td>Cardiovascular Heart</td>
<td></td>
</tr>
</tbody>
</table>

Note that when searching by therapeutic class, only formulary products return in the results: therefore, Crestor does not show at all.

The generic for Crestor, rosvastatin, does return in the results, but one would need to know how to look for it.
How to Search for a Drug Using the Formulary Tool Recap

1. Search for a drug using any of the three different methods:
   * By Name, using the Brand & Generic Name Search Field
   * Alphabetical Search
   * Therapeutic Class

2. Once the drug is identified, verify which form of drug (generic or name brand) the member is taking.

3. Click on the selected drug to see more coverage information, such as restrictions.
Thank you for watching.
You can now do the following:

Acces the Formulary Tool
Search for a Drug and Locate Information Within the Formulary Tool
